Projects

Movie Quest | *React Js + Vite, OmdbApi, Vercel* | [Click here for demo](#)

Unveiled a dynamic movie search application through React, introducing clever elements like debouncing, autocomplete, and trendy dark/light mode toggles. Leveraged the OMDb API to instantly fetch movie details, while prioritizing responsive design to guarantee a sleek presentation on every device.

Pokedex | *React Js + Vite, PokeApi, Vercel* | [Click here for demo](#)

Developed and deployed Pokedex web app using React JS, enabling users to browse and discover various Pokemon species. Incorporated pagination for easy navigation and a search feature to find specific Pokemon. Implemented a dynamic user interface for an engaging experience.”

SkyCast | *HTML, CSS, Javascript, OpenWeatherMap API, Vercel* | [Click here for demo](#)

SkyCast is a weather application that harnesses the capabilities of the OpenWeatherMap API to provide you with real-time weather updates and forecasts. Developed using HTML, CSS, and JavaScript, this app offers a seamless and intuitive interface, ensuring accurate and reliable weather information at your fingertips.

To-Do | *HTML, CSS, Javascript, Bootstrap, Vercel* | [Click here for demo](#)

To-Do web app developed using HTML, CSS, JavaScript, and Bootstrap. The app provides essential task management functionalities, allowing users to add, delete, and edit tasks effortlessly. It also includes additional features such as a "Finished" button to mark tasks as completed and a "Get Pending Tasks" button that filters and displays only the pending tasks.
